

CCI....is going green

Our proven comfort is now manufactured with renewable resources.

Church Chair Industries, Inc. presents our “Green” Foam! With the growing focus on environmental-sustainability, and our environmental-friendly practices, our new “Green” Foam provides yet another way in which CCI demonstrates our continued commitment to our environment.

Our “Green” Foam provides a uniquely innovative offering that combines three characteristics into one high-performance solution.

- 1) Our “Green” Foam is a highly durable comfort material containing plant based renewable, raw materials. These natural ingredients replace significant amounts of the petroleum-based materials traditionally used in foam making.
- 2) Our “Green” Foam is manufactured using a new technology with a virtually emission-free manufacturing process that creates significantly higher-quality cushioning material in a wide variety of density and firmness, resulting in a product that provides consistent comfort.
- 3) Our “Green” Foam contains organic, halogen-free fire retardants.

CCI proudly participates in *green* business practices to reduce transportation costs and pollution and to support local companies. Now, our “Green” Foam provides the comfort, durability and elegant feel you’ve become accustomed to, while conserving the earth’s natural resources.
